APPLICATION & PLANNING

A NEW FENCE

This is an important addition to your property. There are several points to examine to be sure that you've made the right choice. With that in mind, we've put together this brochure to aid you in your selection.

Consider These Factors:

Ask yourself "Why do I want a fence, and what purpose will it serve?"

- a. security or property line marker
- b. privacy
- c. yard enhancement
- d. local requirement (swimming pool, local mandate, etc.)

The Five Steps To Your Fence Purchase:

1. Determine the placement of the fence. You should be aware of your property lines. The best way to do this is from your property survey. We recommend the fence placement be 6" inside of the boundary lines to give you access to both sides of the fence from your property.
2. Check with your local building department and homeowner's association for any deed restrictions which may apply.
3. Determine the amount of money you wish to spend.
4. Architectural Continuity. Keep in mind the style of your home when making your fence choice. You'll want both styles to complement one another.
5. Call the fence professionals at Bruce Fence Co., Inc., 783-8792, and we'll help you with your final choice. Our friendly, experienced staff can assist you in selecting the best fence package to suit your needs.

Choices, Choices, Choices

We offer many styles to suit different tastes, and prices for all budgets. Choose from wood, chain link or ornamental styles. We have fences that offer privacy and those that don't. Mixing styles may also be the key to achieving the results you have in mind.

THE ESTATE SERIES

Custom designed for the truly discriminating homeowner, each style is as individual as your home. Ask one of our sales representatives for information on this exciting series of fence.

CHAIN LINK FENCING

Galvanized or vinyl clad, we have it all. You can choose from green, brown, white, black or galvanized chain link fabric against a galvanized frame, or order an all vinyl system providing color continuity throughout. All galvanized and vinyl fabric carries a 12 year warranty.

All galvanized framework has a uniform hot-zinc coating followed by a layer of zinc chromate, with the exposed surface electrostatically bonded with a clear acrylic finish for permanent protection. The end result is a framework highly resistant to weather, auto emissions, industrial air pollutants, insecticides and fertilizer.

Our gates are notched and welded at all junctures to ensure permanent construction that won't shift once the gate is hung. Our posts are either set in concrete or with a quality drive-anchor assembly.

When purchasing a chain link fence, it is important to remember that there are many different qualities of wire, pipe, fittings, gates and anchoring methods available today. We have taken the guesswork out of this by offering high quality and low price.

Vinyl Fabric – Galvanized Framework

Portable Dog Runs – Our modular dog runs are made from the same materials as our chain link fence. Many sizes are available, however, the most popular sizes are 6'h x 6'w x 10' or 12' long.

Total Vinyl System

Decorative Privacy Screening – Screening for your chain link fence is available in two different types:

- PVC vertical
- Aluminum diagonal weave

GOLDEN FENCE RULES

Before you make your final choice, review the Golden Fence Rules...

1. Be sure that your contract includes all costs in writing and a complete description of all work to be performed.
2. Buy only from a qualified fence manufacturer and installer. Big Box stores do not have working experience in design, fabrication and installation.
3. Insist on a particular fence design that will enhance the beauty of your home. Do not accept substitutes from a retailer's skimpy stock.
4. Beware of gimmick advertising, sub-standard materials and short-cut construction and installation. The lowest price does not equal the best deal.
5. Compare style, quality and grade of stock – WOOD FENCE OR CHAIN LINK FENCE ALONE DOES NOT SIGNIFY QUALITY.
6. Protect your family and your property from lawsuits.
Be sure that your fence contractor is fully insured with Workers' Compensation and General Liability Insurance.
7. Deal only with a fence contractor who maintains adequate facilities to meet all customer requests for service no matter when the fence was purchased.
8. Check your fence contractor's business reputation – ask to see work done in your area.

We hope that you have enjoyed browsing through our general brochure and urge you to visit not only our own, but our competitors' offices and display areas before you make your purchase.

You will then realize how important it is to compare quality and price before you make your final decision.
